

# NVivo eWorkshop

## Working with Media Sources in NVivo

This interactive workshop introduces importing and coding of images, audio and video files, as well as tools for transcribing and annotating these data.

A course for those who are new to NVivo or for those who have used previous versions of QSR software who are working media or image files.

**This eWorkshop is for NVivo for Windows users.**

### Course outline

#### Introducing NVivo and setting up a project

- Introducing NVivo's workspace
- Creating and navigating around a project

#### Working with your information

- Importing image and media sources from a range of digital formats (including .wmv/a,.mp3/4 and .qt)
- Creating memos and annotations

#### Sorting, organizing and analyzing your information

- Identifying themes, topics or ideas and collecting data to support them
- Introducing 'nodes' including node folders and creating nodes

#### Transcribing your data

- Using the Picture Log to add text content to your image
- Techniques for creating verbatim transcripts audio and video files

#### Storing and exporting your media content

### What will you achieve from this course?

At the end of this eWorkshop, you will have the knowledge to set up a project in NVivo, import your image and media data and begin to work with it. You will also be able to use NVivo to transcribe your content and begin to identify themes, topics or ideas.

Once you've completed this eWorkshop, other eWorkshops offer tools for deeper analysis and work with other types of data. Discover how to ask questions of your data, show links between information, and create reports.
